

PRESS RELEASE

VetterTec announces changes to its leadership and a reinforced governance at Group level

A new Global Executive Committee is established, along with an Advisory Board to support and challenge the management team

Kassel, Germany – March 20, 2026

VetterTec today announced an evolution of its governance and leadership structure, including the establishment of a Global Executive Committee and an Advisory Board. Guillaume Benhamou is named Chief Executive Officer, succeeding Thomas Holst. Ivan Zubčić has joined as Chief Operating Officer, and Svenja Beyer as Head of Transformation.

VetterTec is an international provider of industrial drying and dewatering solutions with a global presence spanning North America, Europe and Asia. This new governance and leadership structure reflects the company's global footprint.

The Executive Committee includes members based across Canada, Germany and India, covering Commerce, Operations and Finance and reflecting the global scope of the company's presence and coverage. In addition, Guillaume Benhamou, Bernd Imenkamp, and Ivan Zubčić are Managing Directors of VetterTec GmbH.

Advisory Board appointed to add independent expertise and strengthen oversight

An Advisory Board has now been established to provide independent expertise, strengthen corporate governance, and support the company's leadership on strategic topics. The Advisory Board is chaired by Philippe Carli (former senior executive at Siemens), joined by Kathleen Wantz-O'Rourke (former CFO of SUEZ Group and OPMobility).

"VetterTec combines outstanding technologies with deep engineering expertise across a global footprint. We now need to reflect our global presence and our markets and technologies in the way we are structured. We look forward to this next phase as we reinforce our leadership in our core markets."

Guillaume Benhamou, Chief Executive Officer

"VetterTec is a recognized player across multiple technologies which are key to a number of industrial workflows. I am proud to be joining the company and to lead its engineering, project management and production teams."

Ivan Zubčić, Chief Operating Officer

"VetterTec is known by customers worldwide for its history of innovation, performance and quality. Over the past few years we have expanded geographically, and this next phase in the company's history is a great opportunity to improve how we provide our customers and partners with the highest performing equipment in the marketplace."

Bernd Imenkamp, Chief Sales Officer

About VetterTec

VetterTec is a global provider of industrial drying and dewatering solutions, supporting customers across a broad range of process industries. With deep engineering expertise and long-standing application know-how, VetterTec delivers reliable technologies and services for demanding industrial operations. VetterTec was founded in 1930 and has offices in Canada, United Kingdom, Germany, India and China.

VetterTec is a subsidiary of Moret Industries Group, a diversified industrial group with subsidiaries active across agro-industrial, energy, and defence markets.
